This quarterly report has been prepared in accordance with the same accounting principles as the annual accounts and in accordance with Norwegian Accounting Standard No. 11.

To make the figures in 2003 comparable with the presentation of the 2004 figures, Orkla Beverages is presented on a single line as discontinued operation. The gain from the sale of Orkla's interest in Carlsberg Breweries is presented on the same line.

* Other revenues and expenses totalled NOK -790 million for the year 2003. This is related to write-down of goodwill in Berlingske and restructuring costs in Orkla Foods and Denofa.

** Excluding goodwill amortisation, other revenues and expenses and gain on sale of share in Carlsberg Breweries.

OPERATING REVENUES AND OPERATING
PROFIT BEFORE GOODWILL AMORTISATION IN
NOK MILLION QUARTERLY ***

OPERATING REVENUES

OPERATING PROFIT BEFORE GOODWILL AMORTISATION

*** Excluding Orkla Beverages.

SLIPPL

MAIN TRENDS IN THE FIRST QUARTER

- The sale of Orkla's 40 % interest in Carlsberg Breweries generated proceeds of NOK 17,471 million and a book gain of NOK 12,529 million.
- The Group made good progress in the first quarter and pre-tax profit increased to NOK 782 million, compared with NOK 126 million in the first quarter of 2003, primarily as a result of higher gains from the Financial Investments division. Operating profit before goodwill amortisation was up by approximately NOK 100 million (underlying¹ growth +19 %).
- At the end of the first quarter, the return on Orkla's investment portfolio was 6.4 %, which was lower than the average return on the Oslo Stock Exchange. Market value exceeded book value by almost NOK 3.5 billion at the end of March.
- After the sale of Orkla's interest in Carlsberg Breweries, the Group is in a very strong financial position, and at the end of the first quarter had an equity ratio of 55.9 %. Dividends totalling NOK 6.0 billion will be paid out on 19 May this year. Excluding the provision for dividends, the Group would have had net interest-bearing liabilities of NOK 1.5 billion.

¹ Excluding acquisitions and divestments and currency translation effects.

PROCESSED

MAY 19 2004

THOMSON
FINANCIAL

llw 5/19

Group operating revenues in the first quarter totalled NOK 7,884 million (NOK 7,024 million)². This represented underlying¹ growth of 3 % compared with the corresponding period of last year. Successful new launches by Orkla Foods and somewhat improved advertising markets for Orkla Media contributed to this growth. New business generated revenues of more than NOK 200 million in the first quarter.

Group operating profit before goodwill amortisation was NOK 541 million in the first quarter (NOK 442 million)², equivalent to underlying¹ growth of 19 % compared with the corresponding period of 2003. Part of the increase in revenues and profit, particularly for Orkla Foods, is ascribable to the fact that Easter came earlier this year. Nevertheless, growth was satisfactory.

In the Branded Consumer Goods area, the positive trend continued in the first quarter. Orkla Foods reported strong profit growth, primarily driven by successful new launches by Stabburet in Norway and cost reductions at Procordia Food in Sweden. Orkla Brands had a good quarter, with profit growth in most business areas. Advertising revenues increased in both Denmark and Norway and, in conjunction with cost reductions in Denmark, resulted in profit growth for Orkla Media.

The Chemicals business reported mixed results in the first quarter, with satisfactory profit from the lignin and energy businesses, while both Denofa and the cellulose business continued to be affected by the weak market situation.

Due to a significant rise in the price of the Orkla share, the value of the Group's share-related bonus programmes increased during the quarter and a provision of NOK 21 million was charged against first quarter profit for H.O./Unallocated to cover these commitments.

Profit from associates in 2003 was affected by the sale of Orkla's interest in Enskilda Securities, which generated a gain of NOK 513 million. In the first quarter of 2004, the Financial Investments division realised gains of NOK 310 million (NOK 28 million)², while last year the portfolio was written down for accounting purposes by NOK 668 million because market values were lower than book value.

In the first quarter of 2004, the return on Orkla's investment portfolio was 6.4 %, compared with a strong rise of NOK 13.3 % on the Oslo Stock Exchange Benchmark Index. The dividend-adjusted FT World Index grew 3.2 %. Unrealised gains have increased by NOK 578 million since the beginning of the year and amounted to almost NOK 3.5 billion at the end of the first quarter.

The proceeds of the sale of Orkla's interest in Carlsberg Breweries were received on 8 March 2004 and its effect on net financial costs in the first quarter was therefore limited.

Net profit from Carlsberg Breweries, which comprises the gain on the sale of Orkla's interest, is shown on a separate line for discontinued operations and amounted to NOK 12,529 million. The comparable figure for 2003 represents the net contribution to profit after tax from Carlsberg Breweries.

Group earnings per share amounted to NOK 63.5 in the first quarter (NOK -0.1)², of which the gain on the sale of Orkla's interest in Carlsberg Breweries accounted for NOK 60.7 per share. Before goodwill amortisation, other revenues and expenses and the gain on the sale of Orkla's interest in Carlsberg Breweries, earnings per share were NOK 2.8 (NOK 0.5)². Both the Industry division and the Financial Investments division contributed to growth. Calculations are based on a tax charge of 26 % for continuing business.

ORKLA FOODS

- Broad-based profit growth and good sales growth
- Improvement programmes proceeding as planned
- Higher sales for important branded products

Orkla Foods' operating revenues totalled NOK 3,112 million in the first quarter, equivalent to underlying¹ growth of 4 % compared with the corresponding period of last year. Operating profit before goodwill amortisation was NOK 205 million in the first quarter, up 42 %. The fact that Easter came earlier this year and seasonal sales were therefore somewhat higher made a positive contribution.

The improvement in profit was due to systematic efforts to strengthen competitiveness, including operational efficiency. The improvement programmes are proceeding as planned. The workforce has been reduced by approximately 850 man-years since the end of 2002.

Within Orkla Foods Nordic, Stabburet in Norway, Procordia Food in Sweden and Felix Abba, which operates in Finland, Estonia and Lithuania, achieved growth in operating profit, while operating profit for Beauvais in Denmark was somewhat lower than in the corresponding period of last year. Sales of Pizza Grandiosa rose by around 70 % on the Norwegian market following a large-scale marketing campaign. Chef sausages, pizzas and hamburgers achieved strong sales growth on the Norwegian service station market. Suslavicius-Felix in Lithuania reported 50 % sales growth as the result of a rise in mayonnaise sales. On the Swedish market, there was a successful launch of the fish roe product Kalles Randiga. Sales of Fun Light cordial on the Swedish market were 28 % higher.

Orkla Foods International and Orkla Food Ingredients reported growth in operating revenues and operating profit. The companies in Central and Eastern Europe broadly improved their performance. Orkla Foods International achieved positive operating profit. Idun Industri has decided to move yeast production to Jästbolaget in Stockholm in the first half of 2005. In Denmark, Dragsbæk continued to grow and Bakkedal margarine reported a 38 % rise in sales.

Bakers posted significant growth in operating revenues after taking over the shares in Bakehuset Norge and achieved satisfactory operating profit. Production at Bakehuset Norge in Asker will be moved to more efficient premises at Rud in Bærum. In the course of the year, this move and other rationalisation measures will lead to a workforce reduction of approximately 70 man-years at Bakers/Bakehuset Norge.

² The figures in brackets are for the corresponding period of the previous year.

ORKLA BRANDS

- Continued profit growth, but weaker underlying earnings growth
- Fewer major innovations in the first quarter compared with the large number last year
- Workforce reductions as a natural part of continuous improvement efforts

Orkla Brands' operating revenues totalled NOK 1,200 million in the first quarter, equivalent to an underlying¹ decline of 2 % compared with the first quarter of last year. This was largely due to fewer major innovations in the first quarter compared with last year and stronger competition from private label detergents. Systematic, targeted efforts are being made to increase innovation, which is the main means of creating profit growth and meeting tougher competition in the long term. Earnings growth has been good for the biscuits business as a result of new launches in the second half of 2003. Sales of dietary supplements in Finland continue to develop well. Quarterly sales growth for Snacks in Denmark was good. To a certain extent, first quarter sales were positively affected by pre-Easter stockpiling.

Lilleborg Home and Personal Care's contract production for Unilever was reduced from its previously high level towards the end of the first quarter of 2004. This will affect operating revenues and, to a somewhat lesser extent, have a negative impact on profit for the rest of the year.

Operating profit before goodwill amortisation totalled NOK 223 million in the first quarter (NOK 213 million)². With the exception of Lilleborg Home and Personal Care, and Household Textiles, all business areas achieved profit growth.

Efficiency improvement programmes in all parts of the value chain are continuing and resulting in workforce reductions.

The most important launches in the first quarter were Solidox Syrebløkk (acid block toothpaste), Dr. Greve Sensitiv Dusjgel (shower gel), Extra Drops and Doc Urter (pastilles).

Market shares for Orkla Brands as a whole were relatively unchanged from the previous quarter.

ORKLA MEDIA

- Significant profit growth
- Results for Berlingske in Denmark continued to improve
- Upturn on advertising markets in Norway and Denmark
- Weak circulation trend in Denmark and Poland

Orkla Media's operating revenues amounted to NOK 1,970 million in the first quarter, equivalent to underlying¹ growth of 4 %. This was largely due to improved earnings for the newspaper businesses in Norway and Denmark. Operating profit before goodwill amortisation was NOK 54 million in the first quarter, up NOK 38 million from the corresponding period of last year.

Berlingske achieved significant profit growth in the first quarter compared with last year. This was ascribable to both higher advertising revenues and cost improvements. The rise in advertising volume for text and classified advertisements continues, although the picture as regards price trends is somewhat more complex than in the first quarter of last year.

Newspapers Norway reported higher first quarter profit than last year, mainly due to the improved advertising market and lower costs. Advertising volume (as of February) grew more than the total market.

Newspapers Central and Eastern Europe reported a slight decline in profit in the first quarter. Circulation figures for Orkla Media's Polish newspapers continued to decline, partly due to new launches by competitors. The latter have led to a rise in total circulation. In connection with the competitive situation, there will be intensified focus on marketing and product development for newspapers. The number of free newspapers in Poland is rising. The remaining 51 % of the shares in the regional number one newspaper Gazeta Współczesna in Białystok were acquired in February 2004. An agreement has been signed for the acquisition of 100 % of the shares in two smaller regional newspapers (Echo Dnia and Slowo Ludu in Kielce).

Magazines Norway reported profit growth in the first quarter compared with the corresponding period of last year due to a rise in advertising revenues.

Operating profit for Direct Marketing was higher in the first quarter than last year, due to an improved product mix and lower costs.

CHEMICALS

- Good results for the lignin and energy businesses
- Profit level for cellulose stable but still weak
- Weak market situation and poor results for Denofa
- Improvement programmes and strict cost controls made a positive contribution

Borregaard posted operating revenues of NOK 1,578 million in the first quarter of 2004, equivalent to underlying¹ growth of 4 % compared with the first quarter of last year. A high delivery rate from Borregaard Synthesis and a rise in sales for Borregaard LignoTech contributed to growth.

Operating profit before goodwill amortisation was NOK 97 million (NOK 103 million)². Most businesses reported results on a par with or slightly higher than in the first quarter of last year. The exception was Denofa, where continuing weak markets led to a significant decline in profit.

Borregaard LignoTech reported results on a par with last year. Sales volumes were somewhat affected by the winter season in important concrete additives markets, while other sectors, including speciality products were stable. The acquisition and integration of the Austrian company Biotech contributed to a stronger presence in Eastern Europe.

Borregaard ChemCell's profit was on a par with the first quarter of last year. The continuing weak dollar and higher raw material prices in Norway and Switzerland had a negative impact, while lower energy costs and a good market for basic chemicals had a favourable effect. Prices for speciality cellulose are now improving and, in conjunction with further cost reductions, are expected to have a positive impact on profit from the second quarter.

Borregaard Synthesis posted higher profit than in the corresponding period of last year. This was due to higher sales volumes for pharmaceutical intermediates and aroma chemicals. The positive impact of cost reductions was offset by low capacity utilisation in some parts of the business.

Denofa posted significantly weaker quarterly profit than last year. This was mainly ascribable to a lower industrial processing margin for soya and a certain amount of interrupted production due to logistical problems in connection with raw materials from Brazil. Sales to the fish feed industry were also lower than in the first quarter of last year. Stronger competition from foreign players has weakened the market for oils and fats in Norway. Improvement programmes and strict cost controls partially offset the weak market situation.

Improved profit for Borregaard Energy was due to higher own production of electric power and profit from financial power trading. At Borregaard Vafos and Borregaard Hellefos, productivity growth had a

positive impact. Hellefos also benefited from higher sales volumes and favourable exchange rates.

To compensate for weak markets and the gradual loss of favourable currency hedging contracts, work on improvement programmes has been further intensified. Among other things, an improvement and manpower reduction programme will be implemented at the Sarpsborg factory, which is expected to be completed in mid-2005.

FINANCIAL INVESTMENTS

After rising 48.4 % in 2003, the Oslo Stock Exchange Benchmark Index (OSEBX) rose a further 13.3 % in the first quarter of 2004. The other Nordic markets also grew in the first quarter and the dividend-adjusted FT World Index was up 3.2 %. The return on Orkla's investment portfolio was 6.4 % in the first quarter. There was relatively little change in asset allocation and at the end of the quarter 61% was in Norwegian listed securities, 22 % in foreign listed securities and 17 % in unlisted securities.

In the first quarter, pre-tax profit for the Financial Investments division totalled NOK 401 million (NOK -88 million)², realised gains amounted to NOK 310 million (NOK 28 million)² and dividends received totalled NOK 87 million (NOK 23 million)².

Net purchases of shares amounted to NOK 27 million in the first quarter. The rest of the shares in Amersham were sold for NOK 356 million at a gain of NOK 187 million.

The net asset value of the share portfolio increased by NOK 951 million in the first quarter to NOK 14,587 million. The market value was NOK 15,588 million at the end of March, and investments outside Norway accounted for 32 %. Unrealised gains totalled NOK 3,488 million as of 31 March 2004 and were equivalent to 22 % of the portfolio's market value.

CASH FLOW AND FINANCIAL SITUATION

Cash flow from operating activities amounted to NOK 404 million in the first quarter, down from the first quarter of last year. The trend for working capital was negative for the quarter, primarily due to seasonally high stocks of soya beans. The value of these stocks was higher than last year due to a significant rise in international soya bean prices. Stocks will gradually be depleted over the year.

Net acquisitions amounted to NOK 314 million in the first quarter of 2004, the main one being Orkla Foods' acquisition of Bakehuset in Norway. Divestments in the quarter totalled NOK 17,471 million and were related to the sale of Orkla's interest in Carlsberg Breweries.

The Group's net acquisitions of portfolio shares amounted to NOK 27 million in the first quarter. Orkla has an option programme for senior employees and in this connection Orkla shares amounting to NOK 24 million were sold from Orkla's own shareholding.

Translation effects etc.	(131)	234	103
Total	26,572	17,856	13,579

The Group had a positive net cash flow of NOK 17,297 million in the first quarter. As a result of the sale of Orkla's stake in Carlsberg Breweries, the Orkla Group had net interest-bearing receivables of NOK 4,539 million at the end of the quarter. The Group's average borrowing rate was 4.3 % in the first quarter. A total dividend of NOK 5,972 million has been adopted for 2003, which will be paid out on 19 May this year.

OTHER MATTERS

As a result of the sale of Orkla's interest in Carlsberg Breweries, there have been changes in employees' representation in the governing bodies. On Orkla ASA's Board of Directors, Arvid F. Strand and Stein Stugu have been temporarily replaced by Marianne Torp and Kjell Kjøngisen, who were deputy member and observer respectively, until new elections are held in May/June this year.

If undelivered, please return to:

Orkla ASA, Shareholder service
P.O.Box 423 Skøyen, NO-0213 OSLO, Norway

In the event of a change of address, shareholders are requested to contact their account manager (bank etc.).

Information about Orkla is available at: www.orkla.com

OUTLOOK

There were no significant events in the first quarter that affected the Group's general view of the economic prospects for 2004 as expressed in the Report of the Board of Directors in the Annual Report for 2003. There is still uncertainty about how the global economic situation will develop, although the positive signs are in the majority. In the Branded Consumer Goods area, the primary positive momentum was at Orkla Foods, while the Media business reported significant quarterly growth in advertising revenues for the first time since the first quarter of 2001.

However, the trend for advertising revenues for the rest of 2004 remains uncertain. In the Chemicals business, the markets for the soya business weakened during the quarter and the prospects for 2004 are poor. For the cellulose business, however, there are signs of a rise in prices in certain segments in the second quarter. After the end of the first quarter, a transport strike was called which affects the Norwegian grocery business. The strike has already led to minor losses of sales and profit for Orkla Foods in particular. If the strike continues, however, it will have an increasing financial impact on both Orkla Foods' and Orkla Brands' companies in Norway

Oslo, 3 May 2004

The Board of Directors of Orkla ASA
